Construction Documents

OVERVIEW

The Antero Group managed a design team on a project with New Buffalo Township for a monument sign and bridge lighting and beautification at Exit 1 off of I-94.

The scope included structural design, electrical design, landscape design, and permitting with MDOT and FHWA. This project required detailed coordination and integration with MDOT and FHWA as it corresponded to a separate bridge rehabilitation project. Antero managed the multi-disciplined team to meet New Buffalo Township's aesthetic desires and meet the safety requirements of MDOT and FHWA.

OUTCOMES

- Managed a multi-disciplined team of surveyors, geotechnical engineers, structural engineers, electrical engineers, and landscape architects.
- Presented various lighting, fencing, and beautification options to the client.
- Construction documents and specifications consistent with MDOT standards.
- Permitting with MDOT and FHWA.
